Our farmers are learning one very im ortant thing in farming our clay landsthat is, fall plowing, if done at the right time and well done. Although it does not accord with the views of our exemplars yet experience has taught us its great benefit. No machinery yet invented can fine our clay lands like the frosts of winter.— I can convince any one if they will only look on a piece of barley here, part fall plowed and part plowed this spring. But the benefit to the crop is not all—we can plow for one-half the cost in the fall. Our teams are in good condition, and ready, with a small expense for feed.

VERMIN ON FOWLS. The Massachusetts Ploughman says a good method to rid fowls of vermin, is to take a fenther and dip it into kerosene, and touch it lightly under the wings. It will soon spread over the body and destroy vermin. This is often recommended as an effective remedy. We have not tried it, but should not hesitate to do so if we had occasion. A better way, perhaps would be to keep a box of dry ashes for them to keep off the vermin. But if you mix into the ashes, a few ounces of powdered sulphur, it will make a sure thing of it. This won't cost much anyhow, and you can't do better than to fix up such a box under

can have free access to it. RUMP CONGRESS-RUMP PRESIDENT. They have invented a new epithet in the South, and their friends in the North, with the same facility that they kept step with them in the rebellion, immediately adopted it-they called it the 'Rump Congress." It is an indecent word to use but I speak of it because it has passed into the literature of the Democracy; and when The Lowest Prices and they apply it to Congress, they at the same time apply it to the President. If this is a rump Congress, Johnson is a rump

He was elected by precisely the same votes, in the same States and districts that IF YOU WISH TO BENEFIT YOUR elected Congress; and when we closed we had one more State inside the Union than took part in electing Lincoln and Johnson in 1864-I mean Tennessee. We welomed her, when she returned, with that bond of guaranty in her hand that we required as a surety of her good behavior, as kindly as brethern could be greeted, when her delegation were sworn into their seats. The President represents no more men in his chair than we represented in SPECIAL INDUCEMENTS OFFERED Congress; and when he ran for vice President, these eleven Sates whose votes he did not receive, would rather have voted him a rope than the meanest office in the Government. So much for that slander.

By laying a piece of charcoal on a burn the pain subsides immediately. By leaving the charcoal on one hour the wound is healed, as has been demonstrated on several occusions.— The remedy is cheap and simple, and certainly deserves a trial.

Young Chambers, of Hancock county, Ky., who killed his father with a hoe in the tobacco who killed his latter with a noe in the tobacco field, has been discharged on the ground that he acted in self-defense. It is said that twenty-two murders have been perpetrated in that county, and not one murderer brought to jus-

In the Canadian Parliament recently Mr. China and the Fort Ecie campaign, whereupon a great noise and disorder prevailed for the purpose of choking off the speaker. He made an effort to get a hearing, but the disorder continued, songs were sung, hurrahs given, and paper bullets thrown at the speaker, until at length the mo-tion was withdrawn.

Cossumption .- An eminent French phys. Britannia-Ware, ician proposes to cure all cases of consumption by the administration of raw meat and spirits. He says that this method of treatment has been for some time in use on the continent of Europe, and, to his knowledge, has produced satis-faction in two thousand cases. The raw meat is reduced to a pulp, and, to conceal any un-pleasant flavor it may have, is mixed with sugar. The proportion of alcohol used, which is administered separately from the meat, is about one half that of the meat. Largest Stock

We learn from the Clyde Times, of last week, that measures are being taken to erect a suita-ble monument to General McPherson. A meeting of citizens of Clyde was held on the 3d inst., and a committee appointed to report a plan for the permanent organization of a Monument As-sociation. The meeting was informed that a fund of about \$6,000 is in the hands of a committee representing the Army of the Tennessee, and also that there is a fund in California of several thousand dollars, for the same purpose, ready to be appropriated.

An English magazine writer, in an essay in Every Saturday, speaks of a game which "they play at in France," in which certain members of a company are concealed except their eyes, and the rest of the party have to identify the concealed persons simply by their eyes. The game is known in America as well as in France. The difficulty of identification is incredibly great. It is found that the most intimate friends cannot recognize each other by what is considered the most expressive feature, the rest of the countensnee and figure being concealed.

There was a very irascible old gentleman who formerly held the position of Justice of the Peace in one of our cities. Going down the main street one day, one of the boys spoke to him without coming up to his honor's idea of deference. "Young man, I fine you five dollars for contempt of Court." "Why, Judge, said the offender, "you are not in session." This Court," responded the Judge, thoroughly irritated, "is always in session, and consequently always an object of contempt!" There was disorder in Court as his honor passed on.

A LITTLE MORE RECONSTRUCTION. Another officer of the Freedman's Bureau has been killed in Texas. Arrangements for the murder were probably being made about the time Mr. Randall had his party in training for the march, arm-in-arm, up the aisle at the Convention. Each is a beautiful commentary upon the other. How long is this fursical as well as tragical work to continue? Is there to be no protection, and ne and to this always tar. protection, and no end to this slaughter ?
